

FIBERFLEX® PRO

Fiber-Infused Polyurethane Hybrid Sealant
Seal. Repair. Reinforce.

PROFESSIONAL-GRADE SEALANT ENGINEERED TO FILL CRACKS, BRIDGE GAPS & MAKE LONG-LASTING REPAIRS ACROSS VIRTUALLY ANY SURFACE.

BUILT FOR DEMANDING REPAIRS

FiberFlex Pro is a high-performance, fiber-infused polyurethane hybrid designed for contractors who need a reliable sealant that does more than just fill a joint. The integrated fibers help reinforce repairs while maintaining the flexibility needed to handle movement, expansion, and contraction.

From crack sealing to detailed repairs, FiberFlex Pro delivers strong adhesion, easy tooling, and long-term durability—indoors or out.

KEY BENEFITS

Bonds to Silicone

Adheres to cured silicone sealants where most products fail.

Fiber-Infused Reinforcement

Helps bridge cracks and gaps while creating a reinforced repair.

Flexible & Durable

Designed to move with the substrate without splitting or pulling away.

Multi-Surface Adhesion

Bonds to concrete, masonry, metal, wood, EIFS, stucco, roofing materials, and more.

One-Product Solution

Seal, repair, and detail with a single professional-grade sealant.

APPLICATIONS

- Crack and gap sealing
- Repairs on walls, roofs, and transitions
- Penetrations and flashing details
- Interior and exterior applications

PROFESSIONAL-GRADE RESULTS

Whether you're performing targeted repairs or sealing critical details, FiberFlex Pro delivers reliable performance, strong adhesion, and long-term durability—all from a single, fiber-reinforced sealant. **Seal it once. Trust it long term!**
